## DETAILED ACTION

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a playback apparatus for playing a digital stream in conjunction with an application executing in the playback apparatus. Each independent claim identifies the uniquely distinct features "an application executor operable to execute an application associated with the current title, the application being operable to request the package manager to generate new package information using new merge management information, the new merge management information referencing a third file on the second recording medium for merging with the first file on the first recording medium" and "a playback controller operable to control playback of the digital stream associated with the current title, wherein the package manager sets the third file to read-only when the application requests generation of the new package information". The closest prior art, Nishizawa (US 2004/0240863 A1), Onishi (US 2001/0002846 A1), and Kikuchi et al. (US 6,553,180 B1) disclose conventional playback apparatus, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
